----------------------------	----------------	---

Hi, I'm Rajeev Baniya,

I am skilled in modern web technologies, cloud platforms and AI tools used to build responsive and secure applications. I completed an internship as a Front-End Developer at Unicom Portal, where I contributed to developing a user-friendly web application, optimized its performance by 30% and added accessibility features to improve usability. My technical skills include JavaScript, Python, HTML/CSS, MySQL and MongoDB. I also have experience with frameworks and tools such as React.js, Next.js, Node.js, Tailwind CSS, RESTful APIs, OAuth and Firebase. Additionally, I have hands-on experience with Docker, AWS, Google Cloud Platforms and API integrations.

I'm always excited to learn new technologies, solve problems and work with teams that move fast and focus on results. I focus on writing code that's easy to understand and maintain, while continuously learning and adapting to new situation, which helps me do well both on my own and when working with others.

Best regards,

Rajeev Baniya
