## SUMMARY

Skilled in building responsive web applications, optimizing performance and developing secure authentication systems. Experienced with AI tools, cloud platforms and modern frameworks. Adaptable learner with strong problem-solving skills, clear communication and teamwork abilities

## EDUCATION

### JAIN UNIVERSITY

*Bachelor of Technology in Computer Science & Engineering  
(Specialization in Software Engineering)*

Bangalore, IN

2021-2025

## EXPERIENCE

### Front-End Developer Intern

07/2023-08/2023

*Unicom Portal*

- Implemented secure user authentication, improving account safety and reduced login-related errors
- Improved front-end performance reducing page load time by 30% for better user experience.
- Optimized UI components for responsiveness improving user experience across multiple screen sizes.

## SKILLS

**Programming Languages & Databases:** JavaScript, Java, HTML/CSS, SQL (MYSQL), MongoDB

**Frameworks & Libraries:** React.js, Tailwind CSS, Node.js

**Cloud Platforms:** Amazon AWS, Google Cloud Platform, Firebase

**Tools & Technologies:** Docker, RESTful APIs, Git & GitHub, Postman, Linux

**Soft Skills:** Problem Solving, Communication, Decision Making, Troubleshooting

## CERTIFICATIONS & COURSES

Full-Stack Web Development Course    AWS Certified Solution Architect (Coursera)    React.js (Coursera)

## PROJECTS

**Travel AI - An AI-based Travel Planner** | *React.js, Tailwind CSS, Firebase, Shadcn UI, Gemini AI API.*

- Built a travel planning app integrating AI to generate personalized itineraries.
- Added Google OAuth for secure login and firestore for storing and managing travel plans.
- Designed a responsive modern UI improving user engagement

**BookOtel - Hotel Booking System** | *MERN Stack*

- Allows users to find hotels in different locations and according to their preferences with fast loading pages
- Implemented secure payment system and booking management with email notifications for hotel reservations
- Built a dashboard for admin/owners to manage properties, room availability and booking records.

**FinTrack - Finance-Tracker** | *Next.js, Tailwind CSS, Express.js, Clerk, MongoDB*

- Develop a full-stack finance tracker with budget monitoring and live chart updates.
- Integrated user authentication with Clerk for secure login/signup.
- Designed a responsive dashboard with reusable components for consistent UI.

**SummerEase - Meeting Notes Summarizer** | *React.js, Node.js, Tailwind CSS, Supabase(login/DB), Nodemailer, Groq API*

- Built a meeting notes summarizer app with Supabase for login/DB and customizable summaries for users.
- Used Groq API to generate meeting summaries that can be customized
- Added email sharing using Nodemailer so users easily send summaries directly to their team.
