## EDUCATION

### JAIN UNIVERSITY

Bachelor of Technology in Computer Science Engineering  
(Specialization in Software Engineering)

Bangalore, IN

2021-2025

CGPA – 9.12

## EXPERIENCE

### Software Developer Intern

12/2024-05/2025

ECSC Groups

- Built reusable React components and maintained a consistent UI structure and behaviour across different pages and features.
- Implemented and tested APIs, optimized backend queries to reduce response time by 20–25% also handled API failures and loading states to make sure the UI never broke on the frontend side.
- Identified and fixed UI issues and bugs reported during testing and worked closely with the team to understand feature requirements and keep the code clean and easy to read

### Front-End Developer Intern

07/2023-08/2023

Unicom Portal

- Improved frontend performance using lazy loading and pagination reducing page load time by 30% also tested and fixed UI issues ensuring smooth user experience.
- Created login/Signup with proper form validation and error handling

## PROJECTS

### Travel Planner | *React.js, Tailwind CSS, Firebase*

<https://travelai-app.vercel.app>

- Built a travel planning feature using Gemini and Google Places APIs with secure Firestore storage.
- Google OAuth authentication and responsive UI with React, Tailwind CSS and Framer Motion

DemoVideo - <https://shorturl.at/Ed4f3>

### Hotel Booking System | MERN Stack

<https://bookotel.vercel.app>

- Allows users to find hotels in different locations according to their preferences
- Booking management with email notifications for hotel reservations and Secure payment system
- Built a dashboard for admin/owners to manage properties, room availability and booking records.

DemoVideo - <https://shorturl.at/pMKqA>

### Finance-Tracker | *Next.js, Tailwind CSS, Clerk, MongoDB*

<https://fintrack-apps.vercel.app>

- Built a finance tracker web app to manage budgets, track expenses and visualize spending patterns
- Secure authentication using Clerk and multi-currency support for safe and flexible user accounts
- Added real-time updates and interactive charts so users can quickly see their spending and budgets

DemoVideo - <https://shorturl.at/G1iwV>

### Meeting Notes Summarizer | *React.js, Node.js, TailwindCSS, Supabase* <https://summerease-app.vercel.app>

- Built a meeting notes summarizer app using Supabase for authentication and customizable summaries
- Integrated Groq API to generate summaries and added email sharing using Gmail API (OAuth-based)

DemoVideo - <https://shorturl.at/uiEfA>

## SKILLS

**Languages & Databases:** JavaScript, Python, HTML5, CSS3, SQL (MySQL, PostgreSQL), MongoDB

**Frameworks:** React.js, Node.js, Express.js, Tailwind CSS, Shadcn UI

**Cloud Platforms & Developer Tools:** AWS, Firebase, Docker, Clerk, Supabase, Git, Postman, Vite
