EDUCATION

JAIN UNIVERSITY, Bangalore, IN

Nov 2021- July 2025

Bachelor of Technology in Computer Science & Engineering

GPA: 9.12/10

Coursework: Object-Oriented Programming, Docker, AWS, Computer Networks, Operating System, Database Management Systems

EXPERIENCE

Software Developer Intern

07/2025-12/2025

ECSC Groups

- Developed reusable React components, improving UI consistency and reducing repeated code across the project
- Optimized backend queries reducing API response time by 20–25% and handled API failures and loading states so the UI continued working properly
- Identified and fixed bugs reported during testing and actively contributed to features from requirement to deployment

Front-End Developer Intern

07/2023-08/2023

Unicom Portal

- Improved frontend performance using lazy loading and pagination reducing page load time by 30% and fixed UI issues ensuring a smooth experience for users
- Implemented user authentication with form validation improving security and user experience.

PROJECTS

MeetNote – Real-time Meeting Platform with Live Transcript and Summaries | *Next.js, Node.js, Redis, PostgreSQL, WebSockets, Python(FastAPI)*

- A real-time meeting platform with live captions, chat and post-meeting summaries enabling users to create and join meetings
- Developed the backend with FastAPI, Redis, and WebSockets to handle live transcripts, chat and meeting data in real time
- Built a separate Node.js service for generating meeting summaries and exporting them as PDF or Word files while keeping it independent from the main backend for smoother processing

Link - <https://github.com/RajeevBaniya/MeetNote>

Hotel Booking System | *MERN Stack, Redis*

<https://bookotel.vercel.app>

- A hotel booking platform with search, filtering, and room reservations
- Integrated secure payments and automated email notifications for booking confirmations
- Developed an admin dashboard to manage properties, room availability and bookings

DemoVideo - <https://shorturl.at/pMKqA>

Finance-Tracker | *Next.js, Tailwind CSS, Clerk, MongoDB*

<https://fintrack-apps.vercel.app>

- A finance tracker Webapp to manage budgets, track expenses and visualize spending patterns with interactive charts
- Implemented secure authentication with Clerk and protected routes across the platform

DemoVideo - <https://shorturl.at/G1iwV>

SKILLS

Languages: JavaScript, Python, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Fast API, Tailwind CSS, WebSocket

Databases & Tools: MongoDB, MySQL, PostgreSQL, Redis, AWS, Docker, Firebase, Supabase, Git, Vite
